Here we can see the layers. From starting first layer:

Firstly we can see that file totally is 98 bytes

And then in Ethernet II, we can see destination and source MAC address. As source mac adress – Source: IntelCor_7d:ca:76 (c8:cb:9e:7d:ca:76) is my comp(NIE) and the destination's TaicangT_e0:27:f0 (18:45:93:e0:27:f0)

In internet protocol layer (internet Protocol Version 4), we can anaylze ip address of both source and destination, 192.168.1.64 is source ip address which is my computer, and 173.194.221.113 is destination address which is google server ip address.
